Retraction notice

**Retraction notice to “On a general class of regular rotating black holes based on a smeared mass distribution”
[Phys. Lett. B 743 (2015) 492–502]**Alexis Larranaga^a, Alejandro Cardenas-Avendano^{a,b}, Daniel Alexdy Torres^c^a National Astronomical Observatory, National University of Colombia, Colombia^b Department of Mathematics, Konrad Lorenz University, Colombia^c Department of Physics, National University of Colombia, Colombia

This article has been retracted: please see Elsevier Policy on Article Withdrawal (<http://www.elsevier.com/locate/withdrawalpolicy>).

This article has been retracted at the request of the Editor-in-Chief.

The authors have plagiarized part of a paper that had already appeared in Adv. High Energy Physics, P. Nicolini, A. Orlandi, E. Spallucci, The Final Stage of Gravitationally Collapsed Thick Matter Layers, Vol 2013 (2013), Article ID 812084 <http://dx.doi.org/10.1155/2013/812084>. One of the conditions of submission of a paper for publication is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. Re-use of any data should be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on this matter and apologies are offered to readers of the journal that this was not detected during the submission process.
